

Product Information

Here at Herb UK we strive to make our products as natural as possible and use the latest ingredients that are available to us. However, due to the nature of some of the plant extracts and other organic raw materials, sedimentation can sometimes occur, particularly if the product has been left to stand for a while.

This sedimentation has no effect on the performance of the product and by shaking the bottle, the sediment can be easily reabsorbed into the product.

We will be updating our labels in due course to include this information, but in the meantime, please can you advise your customers that should sedimentation occur, they simply need to shake the bottle well and continue to use the product as usual.

The products which are most likely to be affected are Scalp Treatment and Seal & Shine.

If you need any further information, please contact us on technical@herbuk.com or telephone +44 (0)1590 613490
